Base Deterpal TSK Extra *Dispersing and antistain agent*

Concentrated antistain dispersing/antibackstaining agent, specially recommended for Jeans and Denim article treatment.

Aqualess Activator *Enzyme activator and emery agent*

It is a special waterless compound developed to work with AQUALESS AGED to improve emery and abrasion effect on denim & selected dyed garments.

Protex zip LF Conc *Metal protector finishing agent*

It is a specialty to inhibit metal corrosion. It prevents stains caused by zips, press studs and buttons, whilst dyeing or washing garments

CHEMISTRY PLUS CREATIVITY

Ind Plus series

Ind Plus is a "ready to use" product containing real Indigo dyestuffs. It can be used on PFD garment to obtain genuine Indigo look. Bleaching, discharge with Permanganate and enzyme wash are possible post-treatments.

GOTS certified - ZDHC certified

Novofix WRI-S

It is a special fixing agent to increase rubbing fastness for all kinds of cotton fabrics. It is suitable to improve rubbing fastness especially on dark shades dyed with Indigo, Sulphur, Reactive and Pigment. Also it can be applied to improve rubbing fastness on printed fabrics. It can increase 1 to 2 points the wet rubbing fastness.

Assessed by GREENSCREEN® Safer Chemicals Profiler - ZDHC certified - EIM
Suitable for Nebulized system machineries

Protex ZIP/LF NEW

Protex ZIP/LF is a inhibitor of metal corrosion. It avoids stains caused by zips, press studs and buttons, in dyeing or washing of garments.

GOTS certified - ZDHC certified

Novatex Moon

Novatex Moon is a powered product used to achieve unique acid wash finishing. It is used for garment and denim "worn" decolorizing finishing in powder form. It is a short process and it works in a dry system at cold temperature, saving water and energy.

Assessed by GREENSCREEN® Safer Chemicals Profiler - ZDHC certified

Additive WRI

It is a pre-treatment to improve Novofix WRI-S final result.

Novapret KOR/Mn

Novapret KOR/Mn is a powered product in Gel form that removes dischargeable colours or Indigo in easy way. It is used for garment and denim special decolorizing finishing. It works in a cold temperature system, saving water and energy.

Remover CL/3 & Remover KMN/3

Products for different Indigo bleaching and dischargeable look in tablets form.

Intense CEL BLOCK

Indigo blocker compound, it is excellent to be used on denim garments. It gives soft hand feel.

ZDHC certified

Novafoamer EXTRA

Novafoamer EXTRA is a timing stable foaming agent for random bleaching effect with Chlorine.

Novapret Sand series

Compound ready to use to obtain special dirty effects on garments. It works in a dry system, saving water and energy.

Novapret Glass series

Compound "all-in-one" to obtain colored leather effect without press, by polish only. No need catalyst.

GOTS certified - ZDHC certified

Compound Laser Liq.

Compound ready to use specially formulated to obtain colored effects with laser.

Novapret PD LUC-NEW

Transparent product, based on self-reactive polyurethan resins, to obtain brilliant leather-like effects, without calendaring/press machine or polishing. Possible to add any pigment for shining coloured look.

GOTS certified - ZDHC certified

Novocryl S/TP NEW & Novocryl S-TP FF

It is a thermo-adhesive compound suitable for patch! Due its composition water-based, Novocryl S/TP gives soft and elastic hand feel.

GOTS certified - Assessed by GREENSCREEN® Safer Chemicals Profiler - ZDHC certified - EIM

Printlake Metal

Printlake Metal is a range of products ready to use to obtain metal effect by printing, coating or spray application. Metal colours range includes neutral Pearl (to be coloured with any pigment), Silver, Gold and Copper. Great soft handfeel and very high rubbing fastness.

Novapret TALC

It is a special compound to obtain special MUD or Talc effects on garments.

Novowhite FW

Compound to obtain white effect. Very soft touch.

Novapret OIL

Ready to use preparation based on resins to obtain "oil" effects on fashion garments and denim. Typical dirty effects of the "mechanical workshop", with oily handfeel.

We trust in innovation.
We trust in sustainable practices. We do.
We trust in clean information.
And we trust in social responsibility.

We trust that sustainable is possible.
And it is possible to imagine a new word for it.
We trust in a new wor(l)d.

WE ARE **TRUSTAINABLE**

TRUSTAINABLE RANGE FOR NEBULIZED SYSTEM

OFFICINA+39 developed a specific range of products suitable to be applied in all Nebulized system machineries. Using this type of machinery enables several finishing effects on denim, saving huge amount of water, products and energy. Creating a fog inside the machinery by the atomization of small amount of water and products, we can apply our TRUSTAINABLE range products in very homogeneous way. Working with Liquor Ratio 1:1 only.

The dyes for a sustainable future; the colored powder dyestuffs made with 100% recycled textile materials.

RECYCROM™ is a revolutionary sustainable dyestuffs range, patented, using recycled used clothing, fibrous material and textile scraps. By a sophisticated process, Officina39 has developed a system to reprocess the scraps and transform textile fiber into colored powder. RECYCROM™ is available in many colors using 100% of recycled textile materials fashionable dyeing, printing and coloring.

Reduce, reuse, recycle: this is our green mission.

The green revolution in dyestuffs has begun.
